

YOUR SPECIALTIES DESERVE THE BEST

Azoic polymerisation initiators

Progress with Arkema

Give the best to your processes

2,2'- Azobis Butyronitrile (AZDN)
2,2'- Azobis Isovaleronitrile (AIVN)

For optimal performance in:

- acrylic and vinyl polymerisations
- low temperature blowing agent
- halogenations

At the cutting edge of safety and technology

High purity products
Dust free
Flowability
Liquid Azo

New products for future challenges

Water-borne
